

BLEACH BATHS

- Add $\frac{1}{4}$ cup of liquid bleach (unscented) to about a $\frac{1}{2}$ full tub of LUKEWARM water and mix together (for regular size tubs, not infant tubs). Soak body for 5-10 minutes, being careful not to get it in your eyes or submerging head. Rinse with clean water and PAT dry. Apply your recommended moisturizer afterwards as directed.
- Bleach baths should be done twice a week, unless otherwise instructed by your physician.

Please contact the office if you have any questions or concerns.
